

The New Armor and Cavalry Museum

The Base Realignment and Closure process dictates that both the Armor Center and the Armor Museum will be moved to Ft. Benning, Georgia by 2011.

As part of this process an entirely new Museum will be constructed that honors the patriotic men and women who trained, served and fought in America's mounted forces.

The museum will be a multidimensional that incorporates the latest audio, video and communications technologies. It will be designed to entertain and engage a broad spectrum of the public with particular emphasis on the military family and the parents/families of servicing military.

The facility will be an integral part of the Maneuver Center and a dynamic resource for training, recruiting and retention.

We invite you to comment and contribute to this opportunity to present and preserve the history of Armor and Cavalry in what will be a spectacular and welcoming setting.
